- for Subject Authority Data (FRSAD) (2010)

RDA Toolkit

The screenshot shows the RDA Toolkit homepage. A large red arrow points from the top left towards the 'ACCESS RDA Toolkit' button on the left sidebar. The page includes sections for 'What's New', 'Virtual User Group', 'Full MARC record examples of RDA cataloging now available', and 'RDA Toolkit Essentials'. The right sidebar contains information about RDA and its highlights.

What's New

NEWS: Effective April 1, 2013, online access to AACR2 will be exclusive to RDA Toolkit

- Cataloger's Desktop subscribers with RDA Toolkit subscriptions will continue to have online access to AACR2. [See announcement from Cataloger's Desktop](#).
- RDA Toolkit will introduce enhancements to its AACR2 display in December, 2012. [Learn more about AACR2 in RDA Toolkit](#).

[Learn more about this important announcement.](#)

The [December RDA Toolkit release](#) included the initial publication of reworded chapters of RDA as well as significant enhancements to our display of AACR2. Full details of the release are available on the [Development Blog](#).

RDA TOOLKIT
RESOURCE DESCRIPTION & ACCESS
Virtual User Group

The next meeting of the [Virtual User Group](#) will be held on Tuesday, January 22, 2013 at 9:00 am CST (GMT -6). [REGISTER](#) for this event and follow current development plans on the [Development Blog](#).

Full MARC record examples of RDA cataloging now available

Read more about the examples on our [blog](#), or go straight to the [examples](#).

The video and slides of the November 14th presentation of [RDA Toolkit Essentials](#) are now available. This bimonthly webinar serves as an introduction and guide to using RDA Toolkit and will cover the variety of content available on the site and offer tips on searching and navigating. The next RDA Toolkit Essentials webinar will be held Wednesday, January 16, 2013 at 9:30 am CST (GMT -6). [REGISTER](#).

What is RDA: Resource Description and Access?

Designed for the digital world and an expanding universe of metadata users, RDA: Resource Description and Access is the new, unified cataloging standard. The online [RDA Toolkit subscription](#) is the most effective way to interact with the new standard. [More on RDA](#).

RDA Toolkit highlights:

- Searchable and browsable RDA instructions
- User-created Workflows, Maps, and other tools
- Two views of RDA content—Table of Contents and RDA Element Set

About | Help | Feedback

Include additional elements covered in this chapter and in chapters 6 RDA and 7 RDA according to the policy of the agency creating the data, or according to the judgment of the cataloguer.

5.4 Language and Script LC-PCC PS

Record titles for works in the language and script in which they appear on the sources from which they are taken.

Alternative LC-PCC PS NLA PS

Record a transliterated form of the title either as a substitute for, or in addition to, the form that appears on the source.

Record other identifying attributes of a work or expression in the language and script specified in the applicable instructions in chapter 6 RDA.

Record the descriptive attributes of a work or expression covered in chapter 7 RDA in a language and script preferred by the agency creating the data.

5.5 Authorized Access Points Representing Works and Expressions

When constructing an authorized access point to represent a work or expression, use the preferred title for the work (see 6.2.2 RDA) as the basis for the access point.

Construct the authorized access point representing the work by combining (in this order):

- the authorized access point for the person, family, or corporate body responsible for the work (see 6.27.1.2 RDA–6.27.1.8 RDA), if applicable
- the preferred title for the work (see 6.2.2 RDA).

If two or more works are represented by the same or similar access points, include one or more additional identifying elements in the access point representing the work (such as form of work, date, place of origin, or other distinguishing term). For specific instructions on additions to access points representing works, see 6.27.1.9 RDA.

When constructing an authorized access point to represent a part or parts of a work, apply the instructions at 6.27.2 RDA.

When constructing an authorized access point to represent a particular expression of a work (or of a part or parts of a work), use the authorized access point representing the work and add one or more elements identifying the expression (see 6.27.3 RDA).

Some changes affect the identification of a work issued as a multipart monograph, serial, or integrating resource and require the construction of an authorized access point representing a new work. For changes affecting the identification of a work, see 6.1.3 RDA.

5.6 Variant Access Points Representing Works and Expressions

When constructing a variant access point to represent a work or expression, use a variant title for the work (see 6.2.3 RDA) as the basis for the access point.

If the authorized access point for the work has been constructed using the authorized access point for a person, family, or corporate body followed by the preferred title for the work (see 6.27.1.2 RDA–6.27.1.8 RDA), construct the variant access point by combining (in this order):

- the authorized access point representing that person, family, or corporate body
- the variant title for the work.

Make additions to the access point, if considered important for identification. Apply the following instructions on making additions, as applicable:

PURPOSE AND SCOPE

This Policy Statement, covering several areas of pre-cataloging decisions, represents *LC practice/PCC practice* except where a statement is noted only as *LC practice*.

Determining Mode of Issuance

Mode of Issuance: Integrating Resource?

LC practice/PCC practice: In case of doubt about mode of issuance, apply the following guidelines:

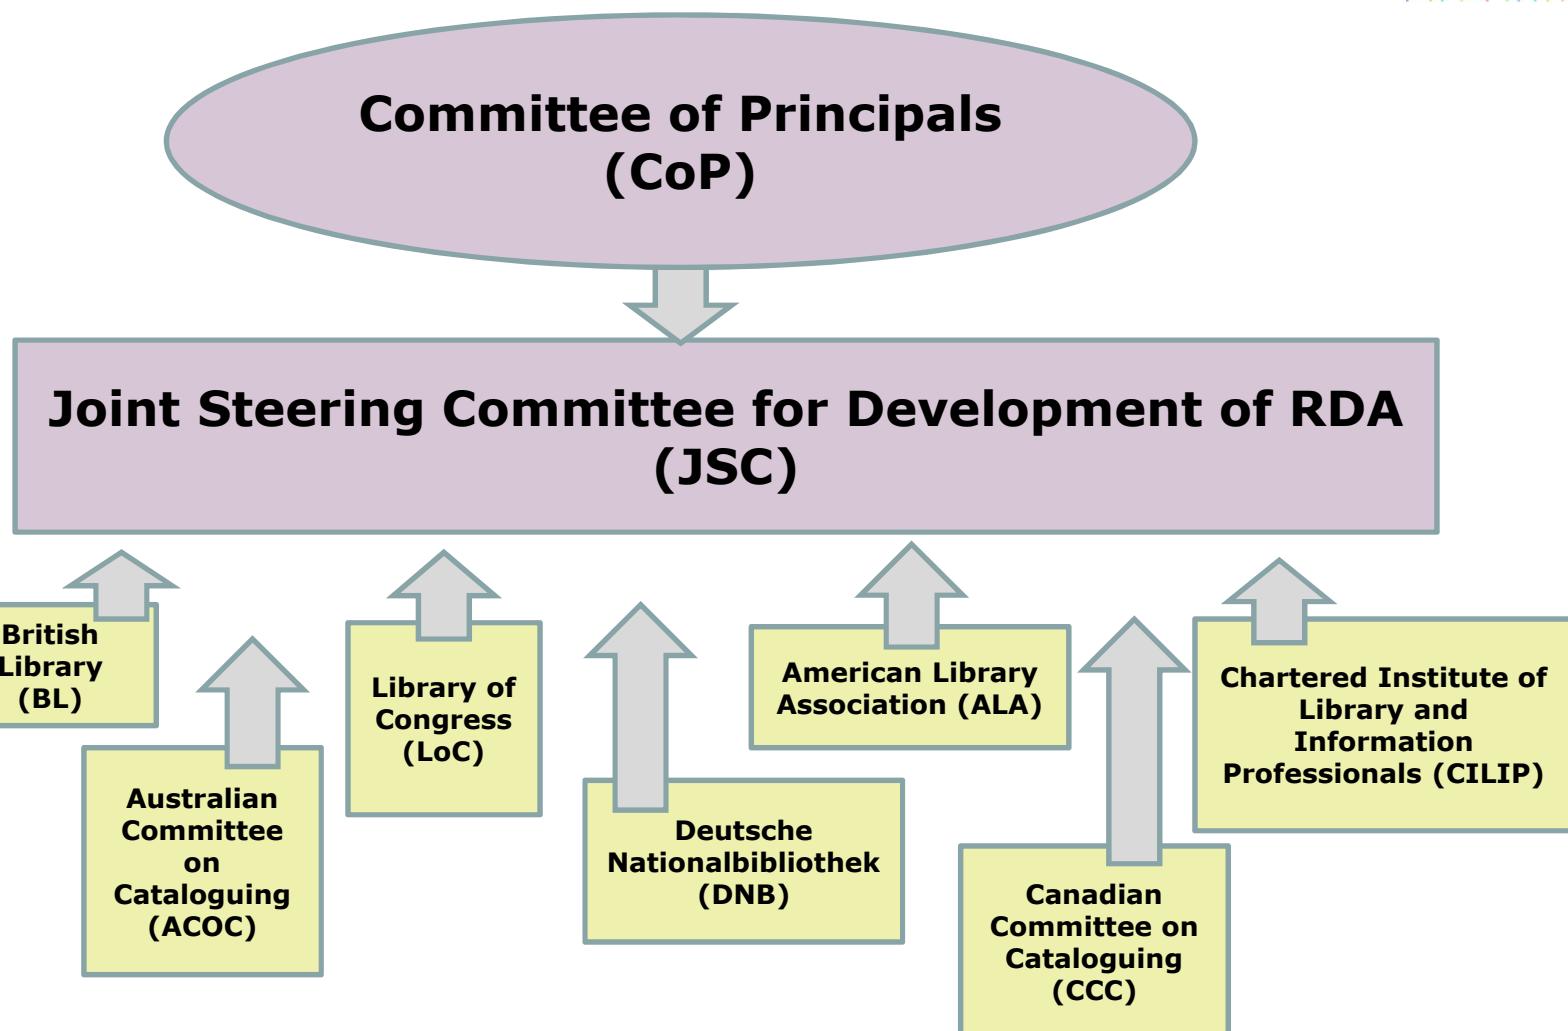

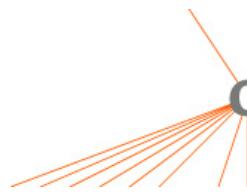

1. If the decision has been narrowed down to "serial vs. integrating resource" and the resource has wording that refers to "edition," determine if that wording represents a numeric designation or an edition statement. If it is a numeric designation, catalog the resource as a serial; if it is an edition statement, catalog it as an integrating resource.
2. If the decision has been narrowed down to "monograph vs. integrating resource," catalog the resource as an integrating resource if there is a likelihood the resource will be updated (i.e., assume the updates will not be discrete); catalog as a monograph if there is no indication that the resource will ever be updated.

Mode of Issuance: Monograph vs. Serial

LC practice/PCC practice: If the resource to be cataloged and/or other bibliographic records in the database indicate that the resource has been or will be published in more than one part that will remain discrete or be published more than once, consider the combination of characteristics below in deciding whether to catalog the resource as a single-part/multipart monograph or as a serial. Note the application of RDA serial instructions for publications of limited-duration activities stated in [RDA 1.1.3 RDA](#).

1. Frequency of publication
 - a) If the resource has a stated frequency of publication (in the title proper, in the preface, etc.), catalog as a serial.
 - b) If the resource is published in new editions, catalog as a serial if the frequency of the editions is one to two years; give greater consideration to continuing to catalog as monographs if the editions are published three or more years apart.
2. Presence and type of numbering. Although the presence of numbering is no longer part of the definition of a serial, most serials except for

RDA in Germany, Austria and German-speaking Switzerland

Current situation

Cooperative library standardization

Internationalisation - Some History...

2001

- resolution in favour of changing from German to international cataloguing codes and formats (AACR and MARC)

2004

- MARC 21 as exchange format for all libraries in the German-speaking countries
- consistent format for authority data
- participation in the development of the standard
- integration of different cataloguing rules for special material types
- German as working language

2009

- Start for a translation of RDA into German

2012

- decision to change to the new international RDA standard – specific and concrete work orders were issued for the implementation project

Resolution

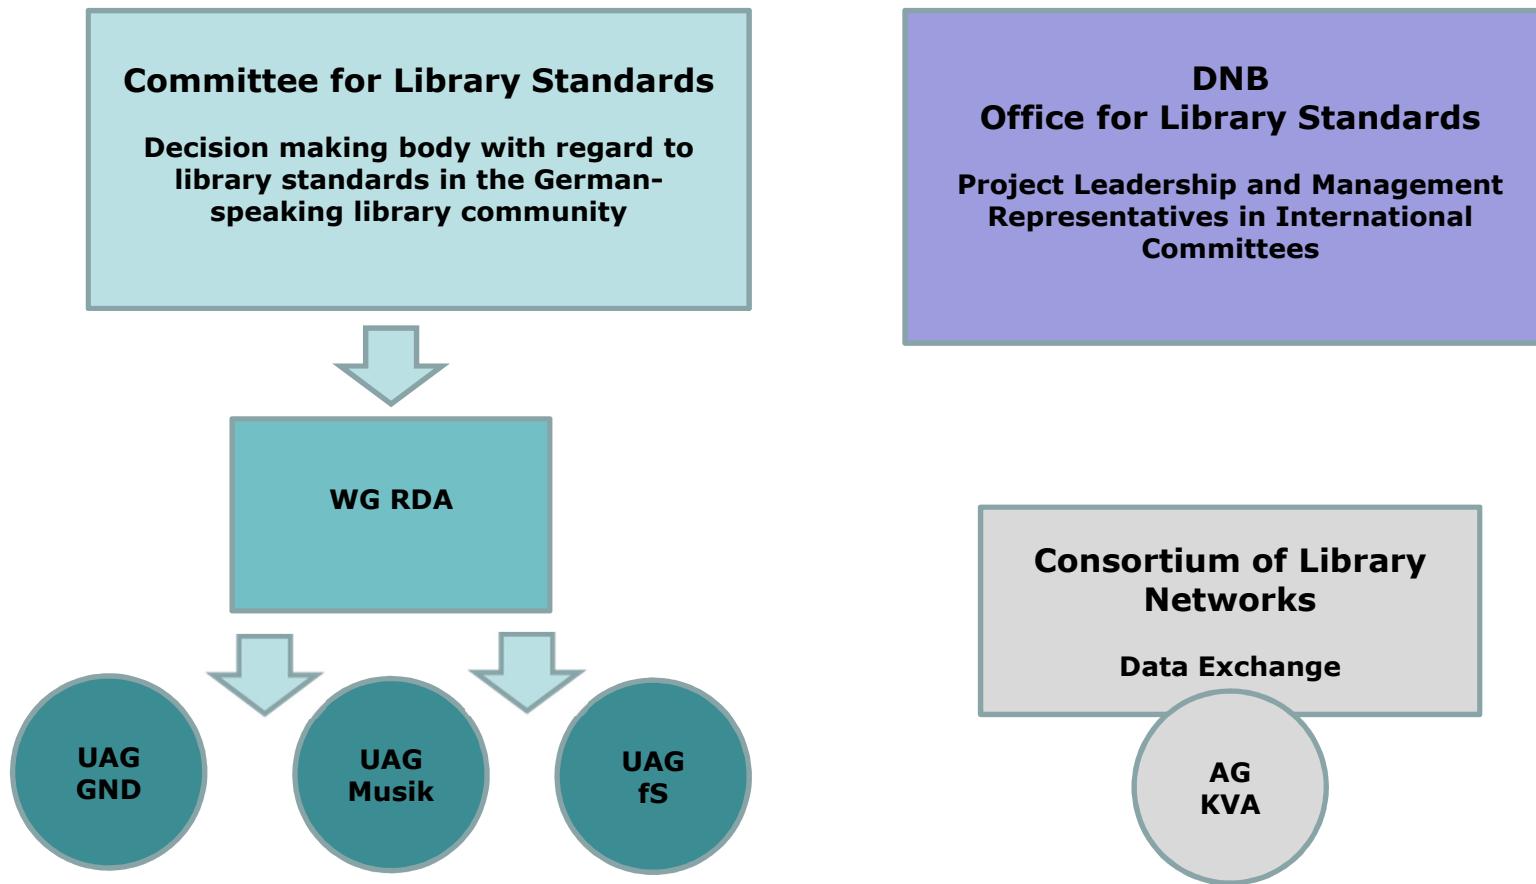

2001 – Resolution in favour of changing from German to international cataloguing codes and formats

**Resolution of the Committee for Library Standards
in May 2012**

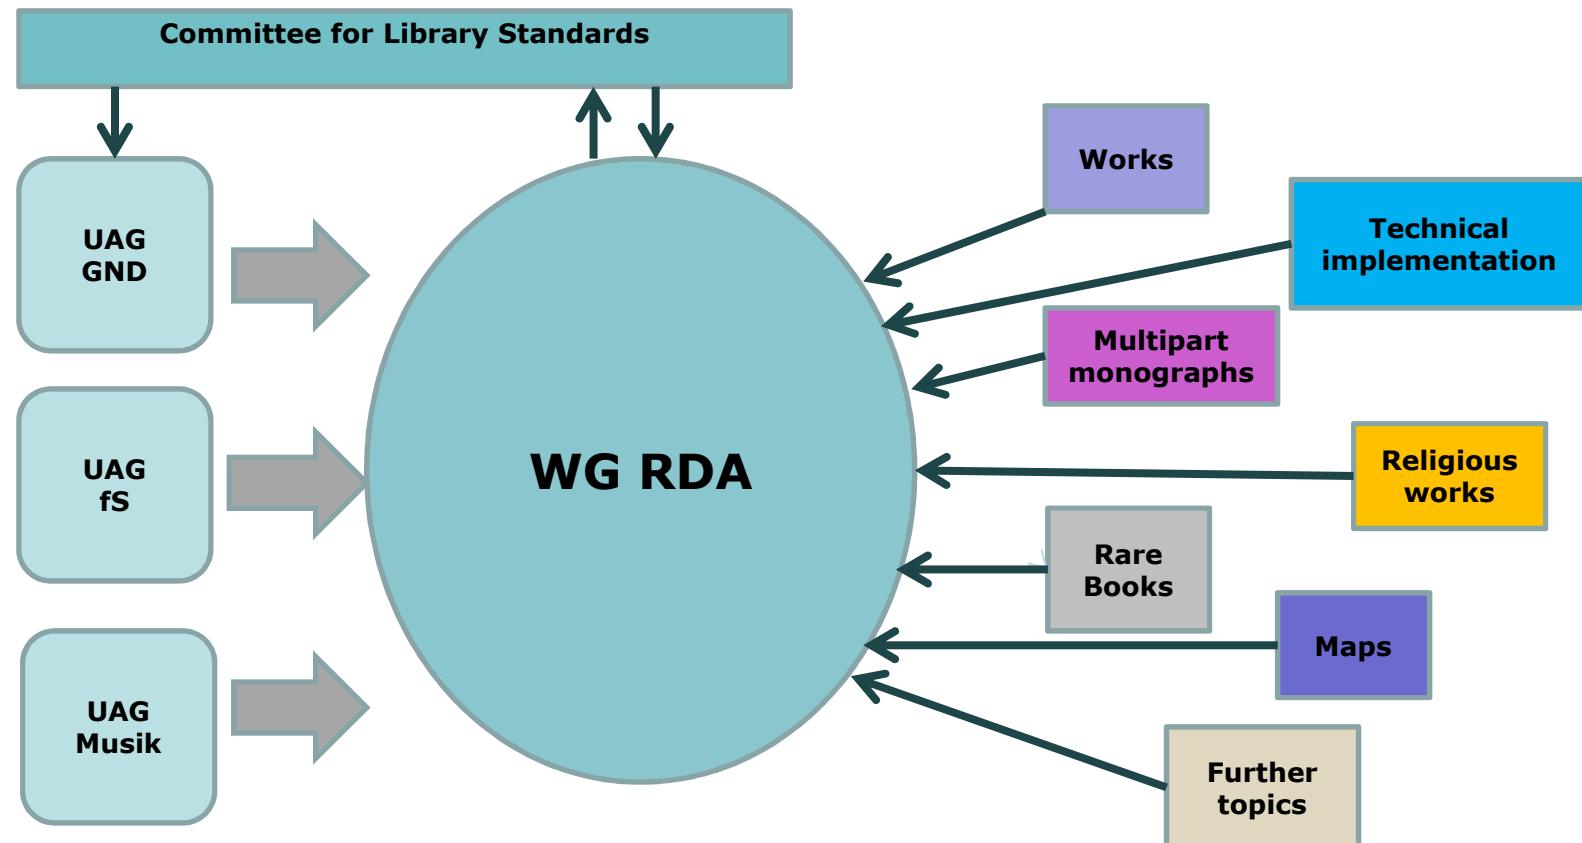

**RDA Implementation in the
German-speaking countries
