

Renate Behrens

# Projekt 3R für DACH-Bibliotheken

## Decision

- Decision process from 2019 until the end of 2020
- Cooperative project set up for the libraries in DACH
- Decision by the Committee on Standards at the end of 2020
- Assignment of the working groups in January 2021

## Work packages

## Concept of the Manual

- The current status of cataloguing in the DACH region is transferred to the manual.
- New concepts are only adopted if they are easy to implement and offer significant added value.
- Documentation as a web application
- Easy and free to use in practical cataloguing

## Impacts

- No full German translation further on
- No Policy Statements in the Toolkit itself, but links between the Toolkit and the manual
- Participation in the content of the Toolkit Community Resources

## Consequences

- Elaborated work process
- Great effort that requires many human resources
- Practical cataloguing can be continued without interruption
- The necessary adaptation training will be less elaborate, as the new texts will be drafted on the basis of the existing rules in DACH.

## Documentation

- The documentation of the future DACH manual will be carried out in Wikibase.
- A corresponding project was also started in the DNB at the beginning of 2020.

## RDA in Europe 2021

More information will be provided in Fall during our planned event „RDA in Europe“.

I hope, I will be able to show then many examples and can report about great work successes 😊.

# Thank you!
