

# WG Zertifizierung (english)

## Certification WG

### Objectives and tasks

Based on DIN 31644 "Criteria for trusted digital repositories", the WG has drafted a certification process and is now overseeing the implementation (further information on the procedure). The extended self-evaluation on the basis of the DIN standard (including assessment, awarding of the nestor seal and registration) is contributing to implementation of the "Memorandum of understanding to create a European framework for audit and certification of digital repositories" agreed in 2010.

### Contact Persons

| name             | institution                    | contact                                                                            |
